B-EX SAP Support

Toshiba TEC as part of SAP Printer Vendor program now allows its users to print Labels with SAP Smart Forms using B-EX Series of Label printers.

SAP Smart Forms support ZPL II which can be printed on Toshiba TEC Label Printers which are Z-Mode compatible.

Smart Forms is a GUI application that is native to SAP. Smart Forms allow the users to design a form inside of SAP and add barcodes, text, graphics and other print related objects. While this application is not as WYSIWYG as a label design application, it handles the various printing elements in a means that is familiar to those who create forms on a regular basis.

Before you can start using Toshiba TEC printers with SAP Smart Forms, one of the following device types must be installed on your SAP system. The device types listed below are designed to support label printing from Smart Forms only. Printing other kinds of documents like SAPScript forms or InteractiveForms by Adobe® (IFbA) is not supported with these device types.

For SAP BASIS Release 6.20 and greater:*
(Using YZB1 Driver)
TTLZAI12.PRI All 203dpi printers
TTLZAI13.PRI All 300dpi printers

For SAP BASIS Release 4.6C and greater:*
(Using LZPL Driver)
TTLZBI12.PRI All 203dpi printers
TTLZBI13.PRI All 300dpi printers
* For information on the SAP Smart Form Device Type requirements and restrictions, please check SAP Note 1097563 and SAP Note 750002.
* Download the required PRI files and proceed with the installation as described in SAP Note 1103422.

A detailed list of Printer Series and models supporting SAP Smart Forms using above device types can be found in the latest version of Toshiba TEC Printer Vendor Wizard note 1135105 on SAP CSN.
